

# Forage Management

*Your input is very valuable to Lone Star County. Please take a brief moment of you time to help us make our programs more effective for you. Thanks!*

**Please check the programs you attended (Check all that apply):**

- Brush and Forage Meeting
- Noble Foundation Tour (Oklahoma)
- Brush and Management Seminar
- Hay Program

**Do you receive the forage newsletter?**       Yes       No

**Noble Foundation Tour.** This section deals with concepts from the Noble Foundation Tour. If you attended the tour, please respond to the statements below.

***As a result of going on the Noble Foundation Tour, I am more likely to.....***

| SATISFACTION STATEMENTS  | Strongly Disagree | Disagree | No Opinion | Agree | Strongly Agree |
|--|-------------------|----------|------------|-------|----------------|
| Use rotational grazing   |                   |          |            |       |                |
| Use of temporary electric fencing for intensive grazing  |                   |          |            |       |                |
| Use of ryegrass as the main winter forage in their grazing systems                                 |                   |          |            |       |                |
| Use high quality forage to produce greater pounds of beef per acre                                 |                   |          |            |       |                |
| Use cost effective management practices to produce cheaper forage                                  |                   |          |            |       |                |
| Use livestock grazing in their wildlife management plan  |                   |          |            |       |                |
| Use rotational grazing on native grasslands to increase carrying capacity and improve grass stands |                   |          |            |       |                |
| Use a breeding system and timing to take advantage of high quality forage during the year          |                   |          |            |       |                |
| Make forage quality decisions based on fertility and maturity principles                           |                   |          |            |       |                |

***NEXT PAGE***

**Brush and Pasture Management Seminar.** This section deals with concepts from the brush and pasture management seminars. If you attended the tour, please respond to the statements below.

**For each of the statements below, circle the ONE number that best reflects your level of agreement after the Brush and Pasture Management Seminar.**

| <b>LEVEL OF AGREEMENT</b>   |                |          |          |                           |                 |   |   |   |   |
|---|----------------|----------|----------|---------------------------|-----------------|---|---|---|---|
| <b>LOW</b>  | <b>AVERAGE</b> |          |          | <b>HIGH</b>               | <b>DISAGREE</b> |   |   |   |   |
| <b>1</b>  | <b>2</b>       | <b>3</b> | <b>4</b> | <b>5</b>                  | <b>0</b>        |   |   |   |   |
| <b>IMPACT STATEMENTS</b>  |                |          |          | <b>LEVEL OF AGREEMENT</b> |                 |   |   |   |   |
| I have a better understanding of when and where to utilize Plateau as a grass control herbicide   |                |          |          | 1                         | 2               | 3 | 4 | 5 | 0 |
| I have improved water utilization and ultimately have better forage production by controlling weeds and brush   |                |          |          | 1                         | 2               | 3 | 4 | 5 | 0 |
| I use new modes of application of brush herbicides, foliar, basal, stream-line basal  |                |          |          | 1                         | 2               | 3 | 4 | 5 | 0 |
| I use brush and weed control management practices that relate to wildlife   |                |          |          | 1                         | 2               | 3 | 4 | 5 | 0 |
| I have increase my knowledge of the herbicides available and what species of grasses, weeds, and brush they control. Some examples include: <i>Remedy</i> ; <i>Reclaim</i> ; <i>Tordon 22K</i> ; <i>Weedmaster</i> ; <i>Grazon P+D</i> ; <i>2 4-D</i> ; and/or <i>Plateau</i> |                |          |          | 1                         | 2               | 3 | 4 | 5 | 0 |

**From these programs, which specific practice(s) did you take home and do/implement?**

**What other forage management topics would you like further information about?**

**\*\*\*\*\*Thanks so much for your time!!!\*\*\*\*\***

Please place this in the self addressed envelope and return. If you have lost that envelope, please return to:
